ABOUT ME

I am a passionate game developer and designer with a strong foundation in problem-solving, collaboration, and leadership. I began coding at 14 and have since developed multiple projects using C++ and C# in engines like Unity and Unreal. Currently pursuing a BSc in Computer Games Development, I actively stay ahead of industry trends through continuous learning and hands-on development, refining my skills in both programming and game design. I thrive in fast-paced, creative environments where I can bring ideas to life and collaborate with like-minded developers.

WORK EXPERIENCE

WIMPY

January 2023 – Present

Waiter

Working in a restaurant, I had many roles I had to fill such as taking orders, making drinks, keeping the restaurant clean and most importantly, keeping constant communication with the rest of the team. I had to keep a level head during small time constraints and fast-paced environments.

EDUCATION

BSC COMPUTER GAMES DEVELOPMENT

University of Westminster, London

Expected Graduation: 2027

Relevant Coursework

- Unity Game Prototype- I worked in a group to design, pitch, and create a prototype 2D platform game.
- Unreal Game MVP- I am currently working on a game design document and a minimum viable product for a third person shooter game among a team of my peers.

INTERESTS

- Game Development**
 - I first started making games when I was 15, using the development platform "Pico-8". Since then, I've used unreal and unity to create projects through A-Levels and University.
- Design**
 - A lot of my free time is spent watching videos on how things are designed, such as Masahiro Sakurai's channel on creating games. I'm also passionate about games in which the player themselves can design things such as Mario Maker and PSVR's Dreams.
- Computer Games**
 - Computer Games are my life's biggest passion. Almost all of my other interests stem from video games, from music to art. Video games are the ultimate form of media.

EDUCATION

Bachelor's degree

Computer Games Development
University of Westminster
2027

SOFT SKILLS

- Microsoft Word
- Microsoft PowerPoint
- Microsoft Excel
- Team Collaboration
- Problem Solving
- Time Management

HARD SKILLS

- C++
- C#
- Unity
- Unreal Engine
- Object-Oriented Programming (OOP)
- Version Control (Git, GitHub)
